Summary

Software Engineer with experience in systems programming (C/C++) and full-stack web development using React, Next.js, Node.js, and PostgreSQL. Proficient in containerization with Docker and CI/CD practices. Trained at 1337 Coding School (UM6P) in a rigorous peer-learning environment. Focused on building reliable, efficient, and maintainable solutions.

Education

Software Engineer

1337 Coding School | UM6P University

Nov 2023 - May 2026

Experience

Hiring Platform | Freelance Project

2026

Developed a recruitment app using Next.js and PostgreSQL with Google Auth. Built a role-based system featuring an Admin Dashboard for job/candidate management and a public portal for user applications. Focused on SSR and clean database schema for a fast, responsive user experience.

Refund Management System

2026

Built a full-stack Reimbursement Management System for the 1337 Coding school using Next.js, TypeScript, and PostgreSQL. Students can submit refund requests across multiple categories, while Admins review and track requests through a real-time dashboard with role-based access.

Projects

LeetConnect | Freelancing Platform

May 2026

Developed a Freelancing Platform with a microservices architecture using React, Express.js, and PostgreSQL. Clients post jobs, Freelancers bid and manage contracts, and both communicate via real-time chat. Admins monitor the platform through an analytics dashboard.

[Source Code](#)

Inception | Containerized Web Stack

2026

Set up a containerized web stack using Docker Compose with Nginx as a reverse proxy with TLS/SSL, WordPress for content management, and MariaDB for the database. Each service runs in its own container with persistent volumes for data and isolated networks for security. Wrote custom Dockerfiles for each service.

Skills

Programming Languages: C, C++, JavaScript, TypeScript

Web Stack: React, Next.js, Tailwind CSS , Node.js, Express.js, REST APIs

Databases: PostgreSQL, MySQL, MariaDB, MongoDB

DevOps & Tools: Docker, CI/CD Pipelines, Git

Systems : Linux, Bash

Languages

Arabic : Native

Frech : Professional Proficiency

English : Professional Proficiency
